Critical Business Thinking

NavisRx®

Critical Business Thinking

Software solutions that take companies to the next level of Strategic Intelligence and Informed Decision Making.

www.NavisRx.com

VISION To be the most preferred solution provider in the industry in the space of Strategic Intelligence and Informed Decision Making.

MISSION To maximize value for our clients through forward-thinking yet pragmatic consulting services and solutions executed by highly qualified professionals. For the purpose, we practice critical business thinking and research while linking business vision to implementation realities.

VALUES Our Operating Principles:
To deliver pragmatic and value based decision support solutions.
At NavisRx, our day-to-day work attributes to these principles:

Solutions: We strive to find right answers for our customers.

Economy: Our work adds significant economic benefits to our customers.

Appreciation: We appreciate the uniqueness of our customers, partner and associates.

Timeliness: We value our customers' time and go extra mile to deliver on our commitments at right time.

Quality: We deliver solutions and services with exceptional high quality. We always strive to minimize the errors in everything that we do for our customers and at the same time ensure that the minor errors, even during the initial phases of delivery, are not affecting our customer's operations in any respect.

Knowledge: We believe that sharing and gaining knowledge is a continuous process. We apply our experience to nurture our solutions and services.

NavisRx IT Solutions India Pvt. Ltd. is an Indian Micro SMB started in fall 2008.

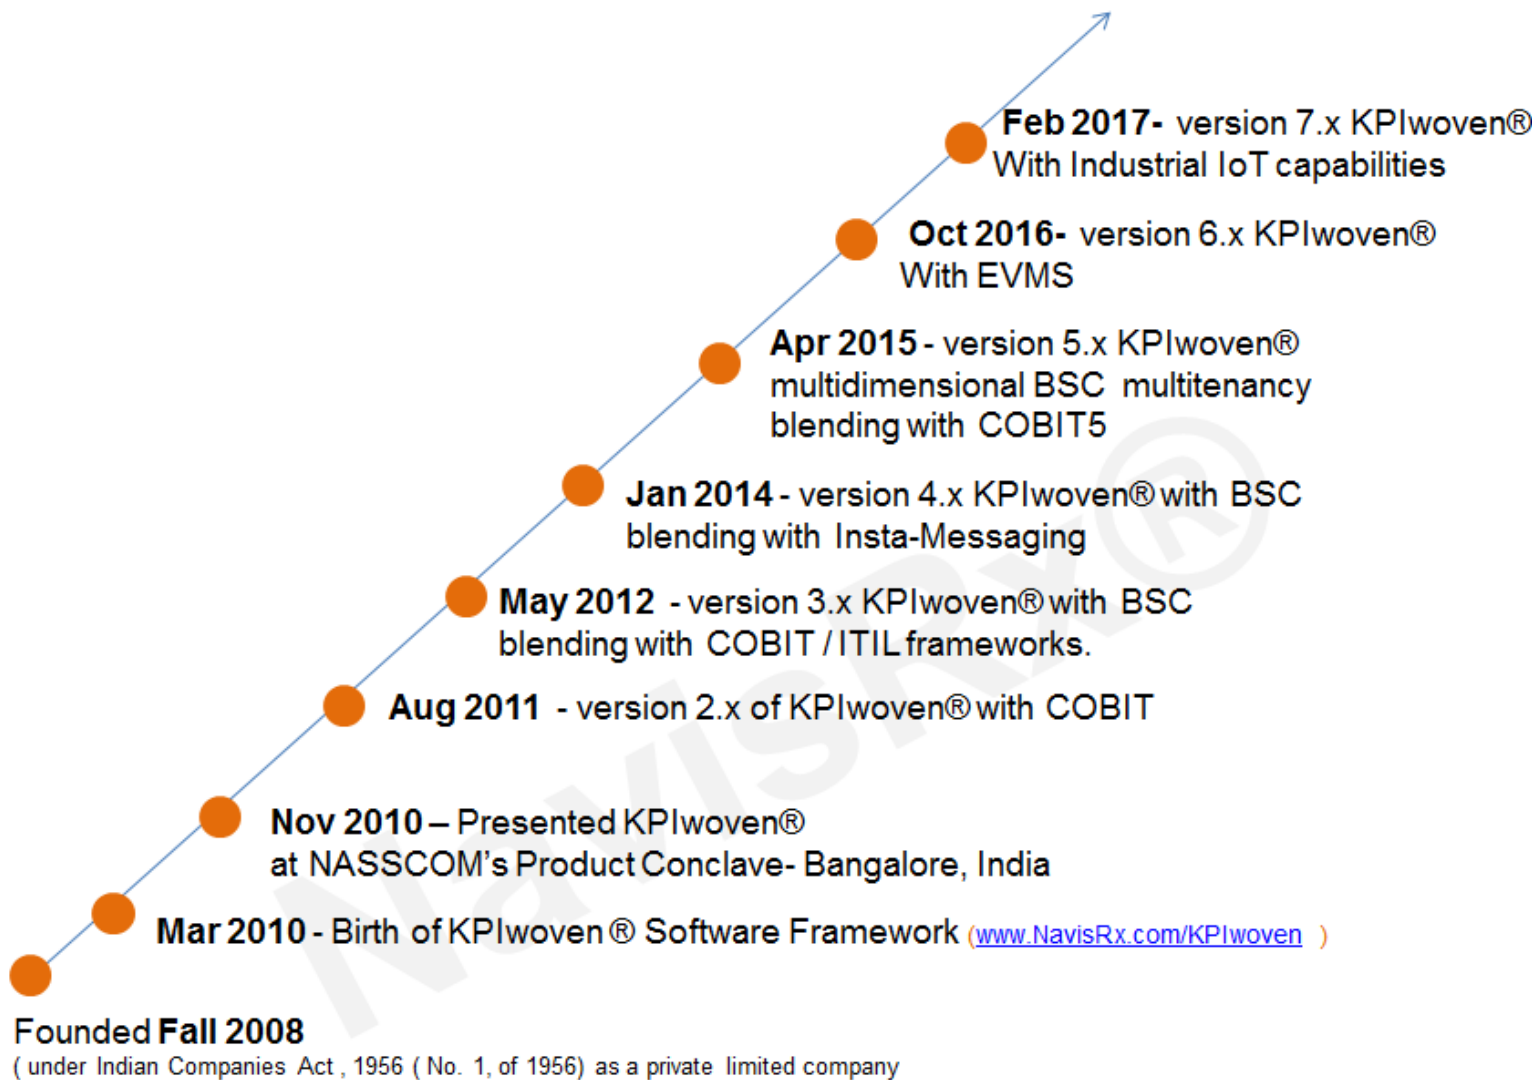

We are the products and solutions company actively researching and contributing in the space of Information Management for delivering Strategic Intelligence.

We understand the *pressure points* in the space of IT- Business management and related services. With our flag ship software framework- KPIwoven® - we are supporting SMBs and enterprises in

1. Providing visibility to the Business Functional Alignment in order to assist businesses in melting operating silos.
2. Providing visibility to Business Drivers (including KRAs, KPIs, KRIs and Project Performance) and their impact on their Strategic outcomes.
3. Optimizing their operational cost, effectiveness and efficiency while managing the synergy among various organisational units. We do this by smartly managing the information available with them.

Our consulting services are flexible enough in appreciating various business cultures and practices. Our solutions can enable our customers with operationally sustainable Information Architectures while keeping in mind their strategic imperatives.

Journey of Product and Solution Development:

Welcome to a future-proof Business Performance Management System

KPIwoven® is web-based, Industrial IoT ready, secure software framework that delivers Balanced Scorecard (BSC) and Business Performance Management (BPM) solution.

It enables you in effectively consolidating metrics across functions and align them with the central strategy. It also provides comprehensive visibility to KGIs, KPIs, KRIs etc. while you actually execute strategy. NavisRx is probably the first software engineering unit in India for blending EVMS and COBIT with BSC. It is a comprehensive BSC software framework that addresses Strategic, Tactical and Operational aspects of your organization.

Following are the quick benefits:

- ✓ Quick visibility to the Strategy Maps.
- ✓ Single window visibility to performance of projects across enterprise.
- ✓ Melt operating silos and improve functional synergy.
- ✓ Better alignment of IT with Business.
- ✓ Minimal time to value.
- ✓ Significantly reduced TCO and improved ROI.
- ✓ Effective use of your Data Warehouse.
- ✓ Capable of processing and managing unstructured data from industrial sensors and machines.
- ✓ Capable of processing managing structured data from numerous business applications including SAP.

Following are the unique features:

- ✓ Secure Web-based functionality with no client side installation.
- ✓ Cascadable, Multi-dimensional, Multi-tenant architecture
- ✓ Role based access with central control over business environment.
- ✓ In-Built communication system to effectively assign and track action items for performance improvements.
- ✓ Manage Project Performance and their impact on strategic outcomes.
- ✓ Manage Risks and their impact on strategic outcomes.
- ✓ Effective Data visualization and co-relation.
- ✓ Complete IT-process management (blended CobiT framework)
- ✓ Baseline business as well as Information Systems (IT- organization)
- ✓ Address your compliance needs (supports frameworks such as COBIT, ITIL etc.)
- ✓ Numerous out-of-box reports that can be tailored as per your specific requirements.

Industry 4.0 and Industrial IoT

Our initial focus is on Industrial IoT – enabling chemical and allied industries to enhance Operational Efficiencies (OE) and linking it to your business strategy. We continue to expand our expertise into various verticals including Healthcare, Pharmaceutical, Automobile, Agriculture, Energy and Other Manufacturing industry. We are committed to deliver complete solution from Problem Identification, Solution Design, Deployment, and Maintenance to Legacy System Upgrades.

Our expertise enable us to tailor made solutions at Industry-Sensor level, Connectivity level, Data Extraction-Transform-and-Load (ETL) level, Analysis level and at Data Visualisation level.

To achieve this, we do all relevant work in the background with our supply chain of industry proven component manufacturers and at the same time, assume responsibility for the solution delivered.

Our delivery methodology:

1. Customer interactions to identify pressure points and problems
2. Providing insights by analysing the facts
3. Architect innovative yet pragmatic solution that fits the bill of our customer
4. Solution implementation from prototyping to full scale within the agreed upon time and budget.

What makes us Unique?

Critical business thinking is the way of life at NavisRx. This attitude also reflects in our solutions.

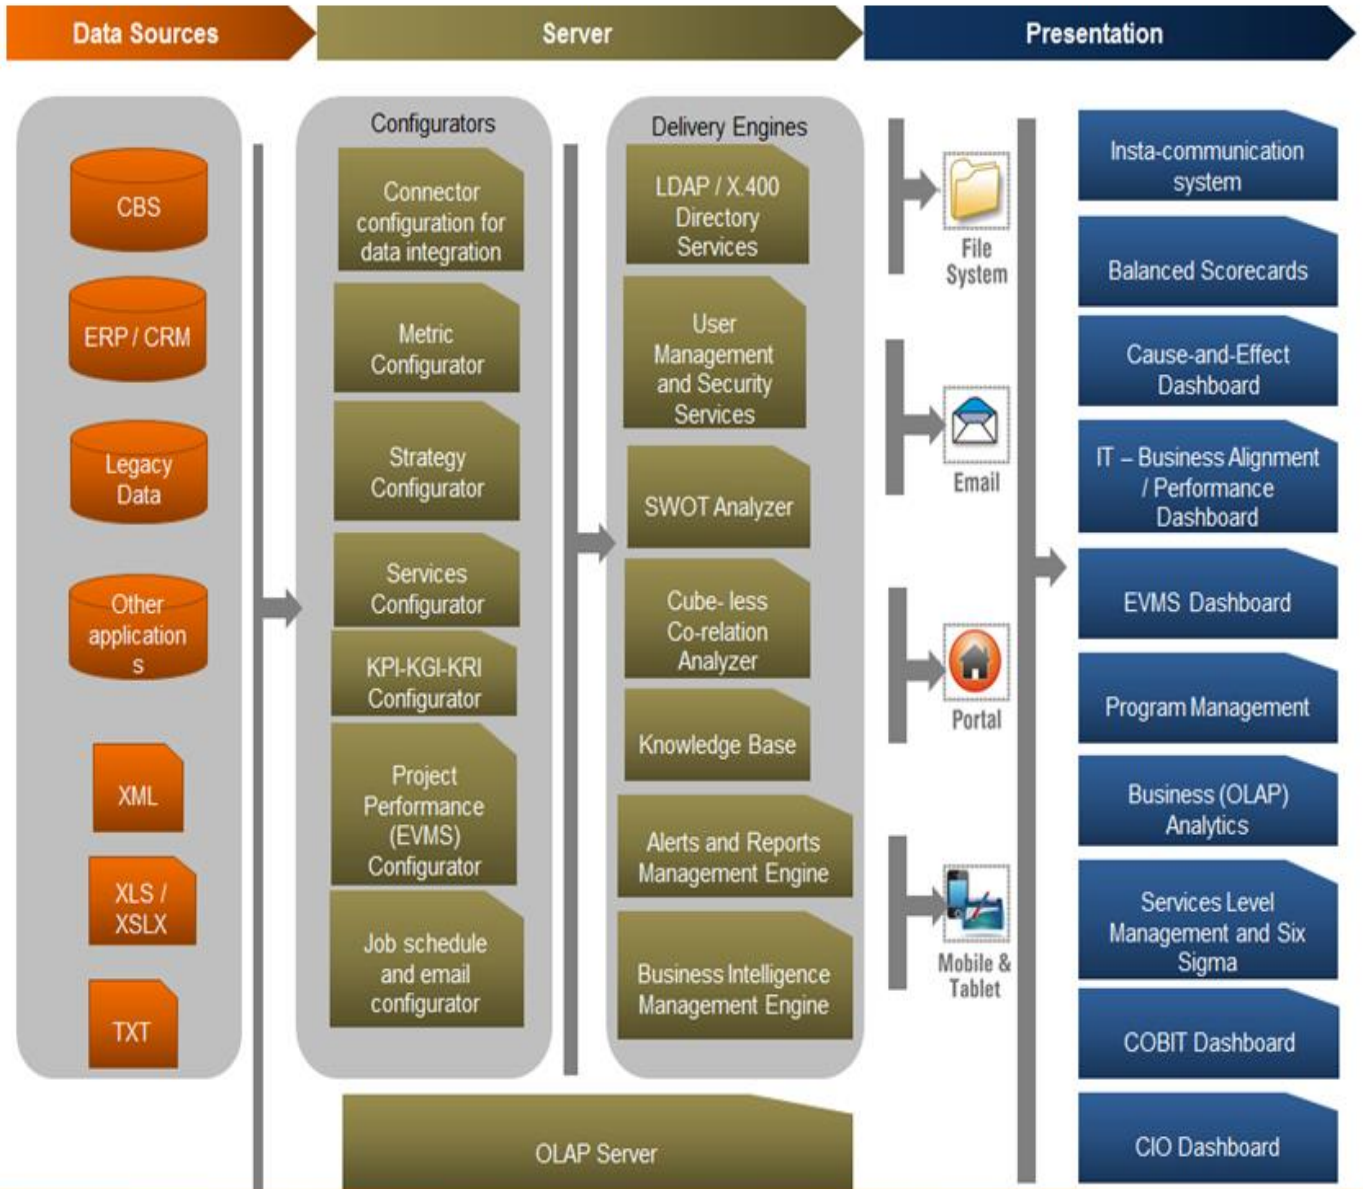

While most of the solution providers these days empower industrial digital revolution; they make use of machine data to drive business decisions. However, the ground reality is that most of the manufacturing companies even today do not have all of their machines 'intelligent' (or still have legacy machines). This becomes a showstopper when they plan for digitization.

This is where NavisRx provides niche solutions and bridges the gaps between intelligent machines and legacy machines thereby making their data available on the network for further processing.

We help in managing and linking your operational floor to your business strategy.

At NavisRx, we understand that agile-manufacturing is influenced by real market demands and hence drive your decisions of investments in your journey towards industrial digital revolution.
